FEATURES

-  This installation system consists in assembling the boards with slots and cuts on their edges by applying a slight pressure on the boards. The boards are then bonded with white glue. Tools are needed for the installation.
-  Slight smoothing of the wood using a brush to achieve a surface with a slight relief.
-  Beveled cut on all 4 edges of the board for emphasizing size
-  **30** Quality product made with selected raw materials, guaranteeing its full residential use for 30 years as provided by L' Antic Colonial.
-  Format where only one board has been used to finish the entire base surface
-  It is necessary to apply adhesive for installing it.
-  **OAK** Made with oak wood.
-  Material from an Asian country.
-  Structure formed by an upper layer that shows the noble aspect of the material, an intermediate layer of wood of different typology, depending on the collection, or HDF board that compensates the tensions between the different parts and a lower plywood that provides dimensional stability.
-  It is necessary to apply adhesive for installing it.
-  The finish imitates traditional hand brushing of the wood, providing a rough and artisan look as the one cabinetmakers would achieve in the past.
-  Applying a color oil or varnish on the wood surface in order to get different color ranges.
-  **N** Combination of oils and waxes prepared for drying with UV lamps. With this finish, wood preserves the natural look of conventional oil but is more resistant to stains from everyday-use products and needs less maintenance. Advantages: Very natural look, low maintenance, and greater resistance to stains from water, wine, juice... Right after installing and before its first use we recommend the use of CLEAN&GREEN AQUA OIL 1 L.
-  Is suitable for installing on water radiant heating
-  Material with many knots on its surface that can have different sizes depending on the type of wood. These, along with any cracks that may appear, are covered with putty.
-  Installation system where gluing the boards to the floor is not necessary. They are placed on a foam, joined together, as long as the product does not already have a foil on the back of the piece.
-  There are considerable color changes between pieces.
-  Material from a European country.
