FEATURES

-  Safety and joint durability are the main features of this easy installation system that guarantees the elimination of gaps between boards throughout the floor's lifetime. The pressure exerted between boards reinforces the union and prevents it from being carried out incorrectly.
-  Slight smoothing of the wood using a brush to achieve a surface with a slight relief.
-  Wood subjected to temperatures above 160 °, thus altering its properties, and giving color to the entire wear layer section.
-  Beveled cut on the long sides of the board in order to create a continuity effect
-  **N** Combination of oils and waxes prepared for drying with UV lamps. With this finish, wood preserves the natural look of conventional oil but is more resistant to stains from everyday-use products and needs less maintenance. Advantages: Very natural look, low maintenance, and greater resistance to stains from water, wine, juice... Right after installing and before its first use we recommend the use of CLEAN&GREEN AQUA OIL 1 L.
-  **30** Quality product made with selected raw materials, guaranteeing its full residential use for 30 years as provided by L' Antic Colonial.
-  Is suitable for installing on water radiant heating
-  Format where only one board has been used to finish the entire base surface
-  Material with some knots on its surface that can have different sizes depending on the type of wood. These, along with any cracks that may appear, are covered with putty.
-  It is necessary to apply adhesive for installing it.
-  Installation system where gluing the boards to the floor is not necessary. They are placed on a foam, joined together, as long as the product does not already have a foil on the back of the piece.
-  **OAK** Made with oak wood.
-  There are considerable color changes between pieces.
-  Material from an Asian country.
-  Material from a European country.
-  Structure formed by an upper layer that shows the noble aspect of the material, an intermediate layer of wood of different typology, depending on the collection, or HDF board that compensates the tensions between the different parts and a lower plywood that provides dimensional stability.
-  3.6 mm
-  It is necessary to apply adhesive for installing it.
-  Installation system where gluing the boards to the floor is not necessary. They are placed on a foam, joined together, as long as the product does not already have a foil on the back of the piece.
